

Do you have a versatile technical skill set? Are you eager to utilize your versatility and experience to further your career? Well, look no further. The worlds largest financial institutions is looking for eager and fast-paced, **SAS Enterprise BI Administrator** in **Charlotte, NC**.

As the **SAS Enterprise BI Administrator** you would be serving individual consumers, small and middle-market businesses and large corporations with a full range of banking, investing, asset management and other financial and risk management products and services. The company provides unmatched convenience in the United States, serving approximately 53 million consumer and small business relationships and award-winning online banking with 29 million active users.

As a **SAS Enterprise BI Administrator** you will be member of a global financial powerhouse that markets, trades, and risk manages financial products. Candidates will need to work onsite but can work remote once they are fully up to speed!

**Primary Role:**

This global leading financial institution is looking for **SAS Enterprise BI Administrator** to be part of a team that has a demonstrated ability to perform as SAS administrator and SAS developer using SAS Server Architecture.

**Qualifications:**

- \*Demonstrated ability to perform as SAS administrator and SAS developer using SAS Server Architecture.
- \*Experience in extracting, transforming and loading source data into the SAS environment from multiple sources including major DBMS and application system transaction files, third-party software packages, and spreadsheet applications.
- \*Strong familiarity with Teradata development and execution environments, and state-of-the-industry reporting and data management tools.
- \*Ability to effectively communicate with various stakeholders: technical and end-user, staff and management.
- \*Ability to work independently.

**Technical Skills:**

- \*Experience with SAS Security.
- \*\*\* Minimum 4 years experience on SAS version 9.1.3 required, version 9.2 highly preferred.**
- \*Knowledgeable and experienced in implementing and optimizing Windows-based SAS products within existing infrastructures.**

**SAS Enterprise BI Administrator Responsibilities:**

- \*Manages the SAS architecture resources of the organization.
  - \*Ensures data integrity, accessibility, and security.
  - \*Job scheduling, workspace structures and user space administration and tracking.
  - \*Administers data recovery and eliminates data redundancy.
  - \*Improves database performance through diagnostics and tuning tools.
  - \*Utilizes data modeling techniques to analyze and specify data usage within an application area.
  - \*Defines logical and physical data structures, and both front and back ends of the data management environment.
- \*\*Candidates will need to be on site for the first 2 months but the position can become remote after that\*\***
